

Executive Brains

BRAIN BOOT CAMP

**Harness Neuroscience and Evidence-Based Programs
to Improve Academic, Behaviour and Social Outcomes.**

BOOK NOW! 0413 484 276

Does your child have any difficulty:

- | | |
|-----------------------|--|
| Remembering | Breaking tasks into small steps |
| Paying attention | Planning & Prioritising tasks |
| Ignoring distractions | Rushing into activities without checking |
| Resisting temptations | |
| Getting organised | |

Enrol your child into Brain Boot Camp and elevate their cognitive skills:

Boost Self-Confidence & Mood

Sharpen Memory

Think Faster

Make New Friends!

Process visual & auditory information more efficiently

Focus, sustain & shift their attention

Our program uses scientifically validated neuroplasticity programs to help your child to strengthen their brains cognitive skills needed for academic learning.

Our program is delivered over a 4 week period. The program consists of:

- * Initial Consultation, including assessment of your child.
- * Access to computer and non-computer resources for 4 weeks.
- * 3 weekly telephone coaching sessions.
- * Post Consultation.

Executive Brains

"Children with stronger working memory, inhibition and attentional skills have been found to make larger gains on tests of math, language and literacy development". (Center on the Developing Child at Harvard University [2011]. Building the Brain's "Air Traffic Control" System: How Early Experiences Shape the Development of Executive Function: Working Paper No. 11. <http://www.developing-child.harvard.edu>)

The program is led by Sheryl Batchelor who is an Educational Specialist / Neuroplasticity Consultant who has been trained in neuroplasticity programs in Australia and overseas and has been helping people improve their cognitive skills for over 9 years in schools and community organisations.
